

To Whom It May Concern:

I am pleased to write this reference letter for Semanti Ghosh. I have known Semanti since she enrolled in my Operations Research–II course at IIT Kharagpur during the spring semester of 2024. As a professor, I found her to be a diligent and hardworking student with a curious mind. She was one of the few students with nearly perfect attendance. I particularly remember her for being very interactive and asking questions until she fully understood the concepts. She consistently submitted her class assignments on time, demonstrating her dedication to the subject. I am confident in her proficiency in topics such as non-linear programming, dynamic programming, stochastic processes, and queuing theory. Her strong analytical and problem-solving skills are evident from her Excellent (Ex) grade, placing her in the top 2% of a class of 80 students.

I wholeheartedly recommend Semanti without any reservations. I am confident she will be an asset wherever she goes.
